

MIGUEL RIBEIRO

JUNIOR FRONT-END/FULL-STACK DEVELOPER

LISBON, PORTUGAL

Hello there! I am a very ambitious and passionate developer from Portugal. My goal is to explore this web development world to the fullest and be able to work with talented and ambitious colleges to build the best web apps.

Besides my fascination for everything code related I also love to explore other facets of web development such as AI/ Machine Learning, the Cloud and DevOps.

I love to apply everything from my previous UI/UX experience to all my projects, ensuring that every application I build is not only functional but also delivers a great user experience.

WORK EXPERIENCE

SLOWD

Co-Founder / Art Direction

From September 2021 till July 2023

What I did:

- Helped establish the base business model;
- General Design (Clothes, Branding, Packaging, ads, etc..)
- Web Site creation/maintenance;
- Created content;
- Marketing.

Responsibilities:

- Layout of landing pages, social media content, marketing campaigns, etc..;
- Design of products and collections;
- Creating/maintaining HTML/CSS/JavaScript code;
- Planing/creating Social Media content.

MY SKILLS

- | | |
|-------------------------|--------------------|
| • HTML/CSS | • PostgreSQL |
| • JavaScript/Typescript | • Docker |
| • React | • NodeJS |
| • NextJS | • ExpressJS |
| • MongoDB | • Machine Learning |
| • TailwindCSS | • Linux (Ubuntu) |
| • Agile Methodologies | • AWS/Azure |

EDUCATION

CEI (Centro de Estudios de Innovación) - Advanced Master / Web Development
Madrid - 2023/2024

Quasar Institute for advanced Design - Erasmus / Graphic Design & Front-End Development
Rome - 2023

ISEC (Instituto Superior de Educação e Ciências) - Bachelor / Graphic Design
Lisbon - 2021/2023

MY STRENGTHS

My goal is to learn everything I possible can about this space. It has become a daily routine to consume a lot of Web Development content and try to apply it/ recreate it in my projects.

I am not afraid of new challenges and I love working in a team setting. I am ambitious and committed to delivering my best to achieve exceptional results.

PERSONAL PROJECTS

AI SQL Generator

The main goal of this project was to develop a platform that allowed people with no actual SQL knowledge to be able to use human language to generate SQL queries.

After its initial conception it has evolved a bit beyond that with model selection for the queries, a pre set DB to use for testing and the ability for the user to connect its own DB.

Technologies involved: React, react-router, react-query, ShadCN, TypeScript, TailwindCSS, PostgreSQL, NodeJS, ExpressJS, GroqAPI.

.admin

One of the projects I developed during my Masters, it's a web app created with the intent of serving as an e-commerce business data/product manager. It would allow the user to check realtime data and manage/add/delete products. At the current time it's mainly a UI/UX project.

Technologies involved: React, react-router, react-query, ShadCN, TypeScript, TailwindCSS, PostgreSQL, NodeJS, ExpressJS.

AI Battle

I helped a colleague with the coding part of his master's thesis. We developed a platform that allows for measuring the quality of code (COBOL and JCL) returned by some pre-selected AI models.

Technologies involved: React, react-router, react-query, TypeScript, TailwindCSS, MongoDB, NodeJS, ExpressJS.
